

Today's world is all about data. And so can be you.

Join our 2-year programme in aHSBC Group Data Technology team and get experience in:

- Managing the bank's data architecture
- Providing business tools to visualize data and deliver automation & regulatory reporting
- ? Working on ready-to-use data assets, trusted data sources and automated data tools
- ? Gathering requirements, designing, developing & testing large-scale applications
- ? Managing architectural diagrams and presenting updates at various architecture forums
- ? Migrating legacy services to cloud platforms
